

Brandywine Extended Market Founders Class

Q2 2023
Strategy Fact Sheet

OBJECTIVE

The Brandywine Extended Market strategy seeks to exceed the return of the Russell 2500 and other small and mid-cap equity blend indexes over a full market cycle, while seeking to limit downside risk.

STRATEGY

The strategy seeks to maintain exposure to U.S. small and mid-cap equities while protecting the downside using Brandywine's innovation of Risk Replacement. Risk Replacement uses put options to offset equity market risk and seeks to pay for the cost of that option protection by investing in a broadly diversified systematic Return Driver Diversifier.⁽¹⁾

STRATEGY PERFORMANCE⁽²⁾

The investment manager has traded the strategies underlying the Return Driver Diversifier in funds and managed accounts beginning in 1991. The hypothetical returns below include that performance, as described in the footnotes on the following page.

Strategy	YTD	3 Month	1 Year	3 Year	5 Year	10 Year	Since Inception
Brandywine Extended Market	11.33%	5.17%	10.64%	12.66%	10.25%	12.64%	13.30%
Russell 2500 TR	8.79%	5.22%	13.58%	12.29%	6.55%	9.38%	10.41%

ANNUAL RETURNS⁽²⁾

	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013
BEM	-17.32%	19.71%	26.47%	30.33%	-3.66%	22.75%	12.20%	-2.30%	16.30%	35.51%
R2500	-18.37%	18.18%	19.99%	27.77%	-10.00%	16.81%	17.59%	-2.90%	7.07%	36.80%

CAPTURE RATIO

SUMMARY PERFORMANCE & RISK METRICS - HYPOTHETICAL⁽³⁾

Brandywine Extended Market vs. Russell 2500 TR		
	BEM	R2500
Years	10 1/2	10 1/2
Annual RoR	13.3%	10.4%
Max Drawdown	-20.8%	-29.7%
Sharpe Ratio	0.47	0.22
Information Ratio	0.51	-

PROTECTION IN BEAR MARKETS

Average Loss During the COVID Crash and 2022 Bear Market

Russell 2500: **-27.3%**
Brandywine Extended Market: **-20.5%**

Had you been invested in Brandywine Extended Market instead of the Russell 2500 you would have been **protected from 1/4 of the losses**, while still preserving the upside potential.

Investment Philosophy:

Reduced Loss = Increased Returns

The Russell 2500 dropped more than 24% during the 2022 bear market and almost 30% during the COVID crash. By reducing those losses to just -21%, investors can start their recovery from higher levels.

The result is not only reduced recovery time but also potentially increased returns. This is why the Brandywine Extended Market strategy has the potential to exceed the returns of the Russell 2500 over a full market cycle.

How Brandywine does it: Brandywine's Innovation of "Risk Replacement"

Risk Replacement retains the upside potential of owning the Russell 2500 but offsets a portion of its high risk with the reduced risk of a portfolio diversified across dozens of Return Drivers.

Brandywine Extended Market:

- Holds significant long position in U.S. small and mid-cap equities
- Buys put options to offset a portion of the downside risk, then
- Seeks to pay for the cost of the put option protection by investing only a portion of the fund's assets in a more broadly diversified portfolio.

That's it. 100% equity exposure is maintained. But a portion of the *risk* of owning the Russell 2500 is *replaced* by the lower risk of holding a smaller allocation made to Brandywine's Return Driver Diversifier.

FOOTNOTES & DISCLAIMERS

(1) A “Return Driver” is the primary underlying condition that drives the price of a market. The “Return Driver Diversifier” is a portfolio comprised of numerous Return Drivers trading across dozens of uncorrelated markets. As espoused by modern portfolio theory, this enables the creation of a lower risk portfolio used to pay for the cost of the strategy’s put protection.

(2) “Strategy Performance” has been independently verified by Alpha Performance Verification Services for the period January 2013 through December 2022 and is based on a combination of actual and hypothetical performance, net of fees. It combines significant exposure to the Russell 2500 and related equity indexes with the performance of the strategy’s put option protection, which assumes the quarterly purchase of one-year put options covering a portion of the account value, and an investment in Brandywine’s Return Driver Diversifier. “Since Inception” starts in January 1991, which is the start of actual trading in Brandywine’s Return Driver Diversifier.

The performance of Brandywine’s Return Driver Diversifier is based on 17 years 11 months of actual trading by Brandywine and 14 years 7 months of tested performance. The actual trading includes the performance of the Brandywine Benchmark Trading Program from 1991 through 1998, Brandywine’s futures trading programs from July 2011 through June 2018 and June 2020 through February 2023, and actual trading beginning in May 2023. The tested performance includes the periods 1999 through June 2011, July 2018 through May 2020, and March through April 2023. All performance is based on the performance of an initial \$10,000 investment, with profits reinvested and based on monthly settlement prices for all investments in the strategy.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE PERFORMANCE. THERE IS THE RISK OF LOSS AS WELL AS THE OPPORTUNITY FOR GAIN WHEN INVESTING IN THIS STRATEGY. HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.

(3) “Annual RoR” (Rate of Return) and “Max Drawdown” are for the past ten year period. “Sharpe Ratio” and “Information Ratio” are calculated over the past five years.

ABOUT BRANDYWINE

Founded in 1982, Brandywine Asset Management has a 40 year legacy of investment research, management and innovation. Brandywine’s founder and CEO is a featured subject in three books and wrote a best-selling book describing Brandywine’s Return Driver based investment approach. This is a key component of Brandywine’s innovation of Risk Replacement. Investors can participate in the Brandywine Extended Market strategy through managed accounts or funds.
