

Brandywine Large Cap Founders Class

Q1 2023
Strategy Fact Sheet
CUSIP: 10532X400

OBJECTIVE

Brandywine Large Cap collective investment fund ("CIF") seeks to exceed the return of the Russell 1000 and S&P 500 over a full market cycle, while also seeking to limit downside risk.

STRATEGY

The fund seeks to maintain exposure to U.S. large-cap equities while protecting the downside using Brandywine's innovation of Risk Replacement. Risk Replacement uses put options to offset equity market risk and seeks to pay for the cost of that option protection by investing in a broadly diversified systematic Return Driver Diversifier⁽¹⁾ portfolio.

STRATEGY PERFORMANCE⁽²⁾

The investment manager has traded the strategies underlying the Return Driver Diversifier in funds and managed accounts beginning in 1991. The hypothetical returns below include that performance, as described in the footnotes on the following page. This information is provided to give investors information on how the strategy employed by the Brandywine Large Cap Fund may have performed prior to the launch of the CIF.

Strategy	QTD	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception
Brandywine Large Cap	5.96%	5.96%	-7.69%	17.94%	13.10%	13.97%	14.63%
Russell 1000 TR	8.03%	8.03%	-7.91%	18.76%	10.99%	12.07%	10.50%

ANNUAL RETURNS⁽²⁾

	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013
BLC	-15.56%	25.98%	23.36%	32.55%	-0.10%	26.40%	11.84%	-0.22%	19.38%	34.47%
R1000	-19.13%	26.46%	20.96%	31.43%	-4.78%	21.69%	12.05%	0.92%	13.24%	33.11%

CAPTURE RATIO

SUMMARY PERFORMANCE & RISK METRICS - HYPOTHETICAL⁽³⁾

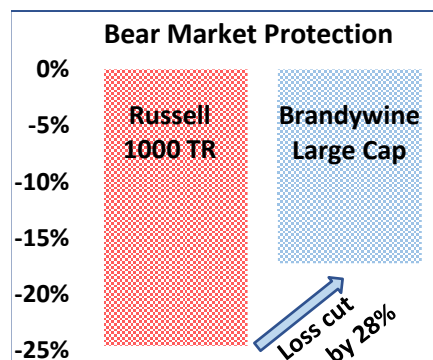

Brandywine Large Cap vs. Russell 1000 TR		
	BLC	R1000
Years	10	10
Annual RoR	14.0%	12.0%
Max Drawdown	-17.2%	-24.6%
Sharpe Ratio	0.73	0.50
Information Ratio	0.36	-

PROTECTION IN BEAR MARKETS

Loss During the 2022 Bear Market

Russell 1000:	-24.6%
Brandywine Large Cap:	-17.2%

Had you been invested in Brandywine Large Cap instead of the Russell 1000 you would have **reduced your loss by 30%**, while still preserving the upside potential.

Investment Philosophy:

Reduced Loss = Increased Returns

The Russell 1000 dropped more than 24% during the 2022 bear market. By reducing that loss to just 17%, investors are able start their recovery from higher levels.

The result is not only reduced recovery time but also potentially increased returns. This is why the Brandywine Large Cap strategy has the potential to exceed the returns of the Russell 1000 over a full market cycle.

How Brandywine does it: Brandywine's Innovation of "Risk Replacement"

Risk Replacement retains the upside potential of owning the Russell 1000 but offsets a portion of its high risk with the reduced risk of a portfolio diversified across dozens of Return Drivers.

Brandywine Large Cap Fund:

- Holds significant long position in U.S. Large-cap equities
- Buys put options to offset a portion of the downside risk, then
- Seeks to pay for the cost of the put option protection by investing only a portion of the fund's assets in a more broadly diversified portfolio.

That's it. A portion of the *risk* of owning the Russell 1000 is *replaced* by the lower risk of holding a smaller allocation made to Brandywine's Return Driver Diversifier.

FOOTNOTES & DISCLAIMERS

(1) A “Return Driver” is the primary underlying condition that drives the price of a market. The “Return Driver Diversifier” is a portfolio comprised of numerous Return Drivers trading across dozens of uncorrelated markets. As espoused by modern portfolio theory, this enables the creation of a lower risk portfolio used to pay for the cost of the fund’s put protection.

(2) “Strategy Performance” prior to the start of trading in the fund in July 2023 has been independently verified by Alpha Performance Verification Services and is based on a combination of actual and hypothetical performance, net of the fees being charged to Brandywine Large Cap Founder Class. It combines significant exposure to the Russell 1000 and related equity indexes with the performance of the fund’s put option protection strategy, which assumes the quarterly purchase of one-year put options covering a portion of the fund’s value, and an investment in Brandywine’s Return Driver Diversifier. “Since Inception” starts in January 1991, which is the start of actual trading in Brandywine’s Return Driver Diversifier.

The performance of Brandywine’s Return Driver Diversifier prior to the start of actual trading in the Brandywine Large Cap fund in July 2023 is based on 17 3/4 years of actual trading by Brandywine and 14 years 7 months of tested performance. The actual trading includes the performance of the Brandywine Benchmark Trading Program from 1991 through 1998, Brandywine’s futures trading programs from July 2011 through June 2018, and June 2020 through February 2023. The tested performance includes the periods 1999 through June 2011, July 2018 through May 2020, and March through April 2023. All performance is based on the performance of an initial \$10,000 investment, with profits reinvested and based on monthly settlement prices for all investments in the fund.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE PERFORMANCE. THERE IS THE RISK OF LOSS AS WELL AS THE OPPORTUNITY FOR GAIN WHEN INVESTING IN THIS FUND. HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.

(3) “Annual RoR” (Rate of Return) and “Max Drawdown” are for the past ten year period. “Sharpe Ratio” and “Information Ratio” are calculated over the past five years.

CIT Disclaimer

Alta Trust is a South Dakota chartered Trust company that acts as the Trustee of this Collective Investment Fund. Collective Investment Funds are bank maintained and not registered with the Securities and Exchange Commission. The Declaration of Trust for the Trust describes the procedures for admission to and withdrawal from a Fund.
