

Brandywine Asset Management Enhanced Target Date Strategies

BRANDYWINE TARGET RETIREMENT

A Smarter Way to Invest

The Brandywine Target Date Strategies are the *only* target date strategies that employ downside protection against significant market losses. Because risk is reduced:

- Brandywine Target Retirement can maintain higher equity exposure across the entire glide path, and
- With bear markets mitigated, recoveries can start from higher levels.

The result: Potentially greater returns and more money in retirement.

Brandywine’s Innovation of “Risk Replacement”

Brandywine’s Risk Replacement approach:

- Holds equity and fixed income positions,
- offsets the high risk of those investments with the purchase of put options, then
- seeks to pay for the cost of the option protection by investing in a lower risk proprietary Return Driver Diversifier.⁽³⁾

That’s it. 100% investment exposure is maintained, while the high *risk* of an underlying investment is *replaced* by the lower risk of Brandywine’s Return Driver Diversifier.

About Brandywine

Brandywine Asset Management has a 40 year legacy of investment research, trading and innovation. Brandywine’s founder and CEO is a featured subject in three books and wrote a best-selling book describing Brandywine’s Return Driver based investment approach. This is a key element of Brandywine’s Risk Replacement strategy, which powers the performance of the Brandywine Target Date Strategies.

Footnotes and Disclaimers

Footnotes

- (1) The Strategy Performance displayed for the Brandywine Target Retirement has been independently verified by Alpha Performance Verification Services for the period January 2013 through December 2022 and is based on a combination of actual and hypothetical performance, net of all expenses. The assumptions used to derive the performance are as follows:
 - ◇ Glide path followed by the Strategy is similar to the glide path used by the most aggressive target date funds offered by the investment industry.
 - ◇ Actual sub-strategies used to capture the returns for each asset class are the Brandywine Enhanced Strategies. This is the key differentiator of the performance of Brandywine Target Retirement, as the Brandywine Enhanced Strategies employ Brandywine's innovation of Risk Replacement to potentially increase returns by reducing risk, therefore enabling recoveries from losses to begin at higher levels.
- (2) The charts and tables compare the combined hypothetical and actual performance of Brandywine Target Retirement with the S&P Target Date Retirement Income benchmark. The growth in value chart shows how a hypothetical initial \$10,000 investment would have grown in each over the periods shown.
- (3) A "Return Driver" is the primary underlying condition that drives the price of a market.

Performance Disclaimer

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE PERFORMANCE. THERE IS THE RISK OF LOSS AS WELL AS THE OPPORTUNITY FOR GAIN WHEN INVESTING IN THE BRANDYWINE TARGET DATE STRATEGIES.

Performance prior to the start of actual trading is considered hypothetical and is derived from a combination of actual and hypothetical performance, net of the fees being charged to the Strategy. As a result, the following disclaimer applies.

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
